1 Introduction

2 Filtering by Damiano

You have dense model which are good to maintain the knowledge of the inputs. Filtering: starting from a fragment, you use the dense model to perform ranking in order to obtain a list of k docid related to your document. You have obtained relevant fragments which will be inserted inside your training data.

The documentation for natbib may be found at

<http://mirrors.ctan.org/macros/latex/contrib/natbib/natnotes.pdf>

Of note is the command `\citet`, which produces citations appropriate for use in inline text. For example,

`\citet{hasselmo}` investigated\dots

produces

Hasselmo, et al. (1995) investigated...
